DETAILED ACTION

The Amendment, filed on October 14, 2008 has been entered and acknowledged by the Examiner.

Claims 26, 28, 29, 31, 32 and 35-42 are pending in the instant application.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given with Mr. Xiaobin You on November 4, 2008.

The application has been amended as follows:

In the Claims

In claim 26, lines 9 and 10 have been replaced by the following text:

---- a heat-exhausting layer formed of a metal thin film, directly formed on the inner side of the seal cover plate and exposed to a space between the metal electrode and the seal cover plate;----

and

in line 16, 'said sealant having a space' has been replaced by -- said sealant having space---

In claim 31, lines 9-12 have been replaced by the following text:

---- a heat-exhausting layer formed of a metal thin film, directly formed on the inner side of the seal cover plate and exposed to a space between the metal electrode and the seal cover plate, the heat-exhausting layer exposing a portion of the seal cover plate to provide a moisture-absorbing agent at the inner side of the seal cover plate;---

and

in line 15, 'said sealant having a space' has been replaced by -- said sealant having space---

In claim 32, lines 9-12 have been replaced by the following text:

---- a heat-exhausting layer formed of a metal thin film, directly formed on the inner side of the seal cover plate and exposed to a space between the metal electrode and the seal cover plate, the heat-exhausting layer exposing a portion of the seal cover plate to provide a moisture-absorbing agent at the inner side of the seal cover plate;---

and

in line 15, 'said sealant having a space' has been replaced by -- said sealant having space---

Allowable Subject Matter

Claims 26, 28, 29, 31, 32 and 35-42 are allowed over the prior art of record.

The following is an examiner's statement of reasons for allowance:

Regarding claim 26, the references of the Prior Art of record fails to teach or suggest the electroluminescence device having combination of the limitations as set forth in claim 26, and specifically comprising the limitation of the heat-exhausting layer formed of a metal thin film, directly formed on the inner side of the seal cover plate and exposed to a space between the metal electrode and the seal cover plate and moisture-absorbing agent provided at the inner side portion of the heat-exhausting layer opposed to the metal electrode.

Regarding claims 28, 29, 35 and 36, claims 28, 29, 35 and 36 are allowable for the reasons given in claim 26 because of their dependency status from claim 26.

Regarding claims 31 and 32, the references of the Prior Art of record fails to teach or suggest the electroluminescence device having a heat-exhausting layer formed of a metal thin film, directly formed on the inner side of the seal cover plate and exposed to a space between the metal electrode and the seal cover plate, the heat-exhausting layer exposing a portion of the seal cover plate to provide a moisture-absorbing agent at the inner side of the seal cover plate along with combination of other limitations as claimed.

Claims 37-39 and 40-42 are allowable because of their dependency status from claim 31 and 32 respectively.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

Art Unit: 2879

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
